SMARTER  
Home Security &  
Automation

powered by  ALARM.COM®

An Alarm.com powered system provides solutions to monitor and protect your home — and everyone in it.

More than just a smart app, Alarm.com seamlessly connects the key systems in your home so they work more intelligently together for you.

---

**Have your home work automatically to meet your needs:**

- Protect what matters most, no matter where you are
- Know who's coming in and out
- Instantly see what you care about
- Rest assured your loved ones are safe
- Create the perfect climate and ambiance
- Take control of your energy use
- Integrate voice-controlled automation devices, like Amazon Alexa and Google Assistant

## SMARTER Home Security

---

Our Smart Home Security system is a **wireless alarm that you are in control of**, no matter where you are. Remotely arm and disarm the system and receive instant notifications to your phone the moment any unusual activity occurs. The alarm is also professionally monitored ensuring a Garda response in the case of unverified activity.

## Energy Management

---

Managing your energy use in the home has never been so simple or effective. Adjust your Smart Thermostat through the app for ultimate comfort. Heating controls proactively work with the Smart Security System to reduce energy use and save you money. In fact, you can save an average of **€300 on your energy bills** per year!

# Home Automation

---

Home automation gives you back control of your house while you gain valuable time to spend on the important things in life. For example, one of our automation features, **Geo-Fencing takes care of the smaller tasks** such as arming your alarm, turning your thermostat down and switching on the lights without you having to do anything.

## Video Monitoring

---

Live view what is happening in your home in real time via the app. The smart CCTV system streams in HD so you get a clear image whether the camera is indoors or outdoors. Clips are stored to the Cloud for you to access when needed. You can add **Video Analytics** to the package for superior security and improved notifications.

# Wellness

---

Wellness is the perfect solution in looking after **elderly loved ones** while they remain independent. Our Wellness package monitors the behaviours of your loved ones and notifies you if anything appears to be out of the ordinary.

## Add On Products

---

SMART BULB

DANALOCK

REMOTE CONTROLLER

We offer a wide range of Smart Home Add on products to complement our Smart Home Bundles. Add ons truly automate your house for the best Smart Home experience. You can choose from a selection of products including plugs, bulbs and even one of our most popular products, the **Skybell Video Doorbell**. The video doorbell streams from your front door right to your phone. You can even speak with guests through the intercom feature.

# Smarter Eco -Friendly Solutions

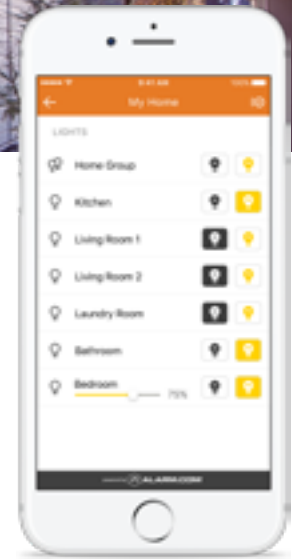

---

Did you know that **61% of energy use in the home is produced by heating**? At Smartzone we are fully aware of the incredible rate of carbon produced by heating methods. This is why we offer Heating Controls. Heating Controls are not only economical, but are also beneficial to the environment by significantly reducing your energy use. According to the Sustainable Energy Authority of Ireland, heating controls can effectively reduce your energy use by up to 20%.

Our Smart Plugs and Smart Bulbs also help to conserve energy use in the home. Our Smart Bulbs are LED meaning they use less energy than traditional bulbs. Smart plugs allow you to switch electronics off completely, so they are no longer left on standby, meaning you cut out unnecessary usage and in turn reduce your bills!

# SEAI Better Energy Homes Heating Controls Grant

---

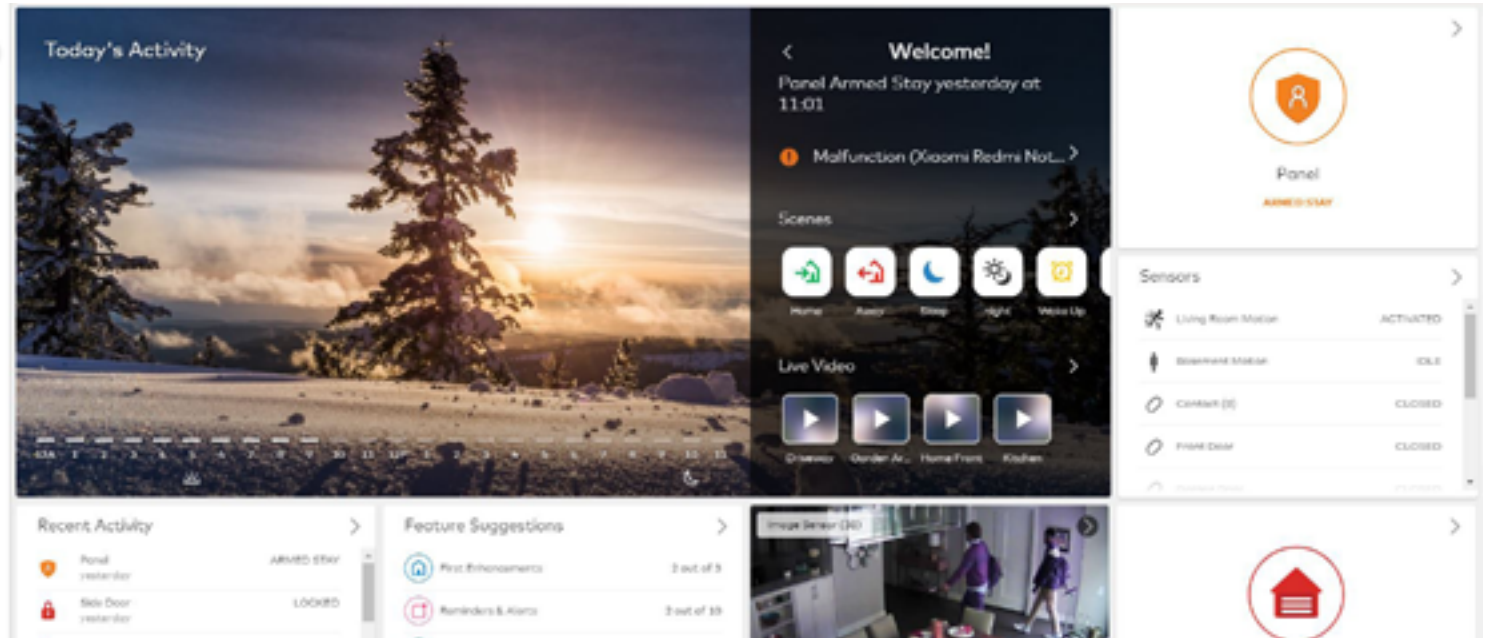

Was your home built prior to 2006? If so, and if you have not previously claimed a Heating Controls grant, we can offer you Heating Controls for no extra cost with your Smart Home Security Package. Smartzone's partnership with the Sustainable Energy Authority of Ireland allows us to claim the Better Energy Homes Heating Controls grant on your behalf so you pay less and don't have to worry about all that paperwork.

If you're unsure of when your home was built there's no need to worry. We can check your home during the Free Home Assessment to see if it is grant applicable. If you want to know more about how you can reduce your energy use call our customer service team today.

# Virtual Demonstration

We fear the things we don't understand. Luckily Smart Home technology is easy to use meaning there is absolutely nothing to be afraid of. To prove it we are giving you access to a virtual demonstration app so you can see for yourself how simple it is to navigate. Explore the features of the app and discover the many benefits of a system that works holistically as one eco-system.

The virtual demonstration gives you the perfect opportunity to test the Smart Home waters. Learn how you would set notifications, arm your system and adjust the thermostat. It couldn't be easier!

# Free Home Assessment

---

It is our job to ensure that you understand and feel comfortable with our system before any commitment. That is why we offer Free, no obligation, Home Assessments to give you the opportunity to sit down with our Smart Home experts and get answers to any questions you may have.

During the assessment we will guide you on how you can create a Smarter, Safer and Energy Efficient home. We will also use the time to provide you with a quote that is suited to you and your home.
